SUMMARY

Final-year B.Tech Computer Science student at IIITDM Jabalpur (CGPA: **8.4/10.0**) with hands-on experience building scalable full-stack web applications using React, Next.js, Node.js, Django, MongoDB, and Firebase. Strong foundation in Data Structures & Algorithms, Operating Systems, DBMS, and Computer Networks, consistently securing 8+ grades in core CS subjects. Recognized as an **NPTEL STAR** for outstanding performance in SWAYAM courses and passionate about building scalable software systems.

EDUCATION

IIITDM Jabalpur

B.Tech in Computer Science & Engineering

Aug 2023 – May 2027

CGPA: 8.4/10.0

TECHNICAL & SOFT SKILLS

Languages	Python, JavaScript, TypeScript, C, C++, SQL, HTML, CSS
Frontend	React, Next.js, Tailwind CSS
Backend	Node.js, Express.js, Django REST Framework, REST APIs
Databases	MongoDB, Firebase Firestore, MySQL
Tools & Cloud	Git, GitHub, Docker, AWS (basic), Firebase, Vercel, Cloudinary
Core CS	DSA, Object-Oriented Design (OOD), DBMS, Operating Systems, Computer Networks
Soft Skills	Agile Collaboration, Cross-functional Communication, Problem Solving, Adaptability

EXPERIENCE

Fusion ERP Module Development, IIITDM Jabalpur

Aug 2025 – Present

- Developed a scholarship management module using React and Django REST Framework to automate eligibility verification and merit list generation.
- Built responsive dashboards and multi-tier approval workflows for students, faculty, and administrators.
- Designed and optimized secure REST APIs for application review, verification, approval, and real-time status tracking.
- Collaborated using Git, GitHub code reviews, Agile development practices, and software engineering best practices.

PROJECTS

SAVIOUR – Disaster Management Resilience Platform

Demo | GitHub

- Developed a real-time disaster management platform with GPS-based SOS alerts, live weather intelligence, and authority dashboards using Next.js, Firebase, and Leaflet.
- Designed an offline-first architecture with local caching and data synchronization to ensure communication resilience during active network failures.
- Implemented secure real-time SOS broadcast reporting, token validation, and role-based authority dashboards for dispatchers.

FarmEase – Agricultural Intelligence Platform

Demo | GitHub

- Developed an agriculture intelligence platform utilizing Next.js, MongoDB, and secure token-based JWT authentication. Designed scalable MongoDB schemas supporting multiple user roles including farmers, laborers, employees, and administrators.
- Integrated the PlantNet API for automated disease identification and crop health diagnostics using secure webhook handling.

MeetTask AI

Demo | GitHub

- Developed an AI-powered meeting transcription and task management platform using AssemblyAI for speech-to-text and automated action-item extraction.
- Designed secure role-based access controls (RBAC) and Firebase-authenticated security layers to isolate workspace data.
- Integrated AssemblyAI pipelines for speech-to-text processing and automated action-item extraction from audio.

ACHIEVEMENTS

- JEE Main 2023: Secured **98.2 percentile**, ranking among the top **1.8%** of over **1.2 million** candidates nationwide.
- Recognized as an **NPTEL STAR** for securing **A+ grades in all 4 Computer Science SWAYAM/NPTEL certification courses**.
- Maintained **20+ GitHub repositories** with over **450 commits**, demonstrating consistent full-stack development, version control, and collaborative software engineering.
