SUMMARY

Final-year B.Tech Computer Science student at IIITDM Jabalpur (CGPA: **8.4/10.0**) with hands-on experience building full-stack web applications using React, Next.js, Node.js, Express, MongoDB, and Firebase. Interested in Software Engineering, backend systems, scalable web applications, and database optimization with strong foundations in DSA and core CS.

EDUCATION

IIITDM Jabalpur

B.Tech in Computer Science & Engineering

Aug 2023 – May 2027

CGPA: 8.4/10.0

TECHNICAL & SOFT SKILLS

Languages	JavaScript, TypeScript, C, C++, SQL, HTML, CSS
Frontend	React, Next.js, Tailwind CSS
Backend	Node.js, Express.js, REST APIs
Databases	MongoDB, Firebase Firestore, MYSQL
Tools	Git, GitHub, Vercel, Cloudinary
Core CS	Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
Soft Skills	Agile Collaboration, Problem Solving, Teamwork, Technical Communication, Adaptability

EXPERIENCE

Fusion ERP Module Development, IIITDM Jabalpur

Aug 2025 – Present

- Developed a scholarship management module using React and Django REST Framework to automate eligibility and merit list generation.
- Built responsive administration dashboards and seamless multi-tier application workflows.
- Designed and optimized secure REST APIs for application review, verification, multi-stage approval, and status tracking.
- Collaborated effectively within a software engineering team using Git, GitHub code reviews, and development best practices.

PROJECTS

SAVIOUR – Disaster Management Platform

Demo | GitHub

- Built a full-stack disaster management application utilizing Next.js, Firebase, TypeScript, and Leaflet interactive maps.
- Implemented real-time SOS broadcast reporting, automated localized weather alerts, and role-based authority dashboards.
- Designed an offline-first architecture with local caching to ensure data resilience and communication during active network failures.

FarmEase – Agricultural Intelligence Platform

Demo | GitHub

- Developed an agriculture intelligence platform utilizing Next.js, MongoDB, and secure token-based JWT authentication.
- Integrated the PlantNet API for automated plant disease identification and data-driven crop health diagnostic assistance.
- Engineered a localized labor-matching hub alongside AI-powered crop recommendations and dynamic market information modules.
- Implemented complex schema designs to host separate user workflows and interactions for farmers and laborers.

MeetTask AI

Demo | GitHub

- Built an AI-assisted meeting transcription and agile task management application for engineering work environments.
- Integrated AssemblyAI pipelines for speech-to-text processing and automated action-item extraction from uploaded audio files.
- Developed secure role-based access controls and dashboards with Firebase authentication to isolate workspaces.

ACHIEVEMENTS

- JEE Mains: **98.2 percentile** (Top 2% nationwide out of 1.2M candidates).
- Built, optimized, and deployed multiple full-stack production-ready web applications on Vercel architectures.
- Maintain an active GitHub footprint with over 15+ repositories and nearly 500 commits showcasing full-stack workflows and clean engineering code.
